AYLESBURY FARM Flock No. 17

Brucellosis Accred. No. 850 Johnes MN3 No. S 19

J.A & D.J Krieg

Aylesbury Farm is a foundation White Suffolk stud in its 25th year of production. Early rams were purchased from

Eloura and Langley Heights and mated with Suffolks, which have been part of Aylesbury Farms breeding program for

many years. Later genetics from Leahcim, Penrise, Gypsum Hill, Detpa Grove,

Wheetelande & Annavilla have had an

influence on the stud. DG328/05 was purchased in 2006 for his excellent hind quarter &

has proven to be a winning

combination over our easy care ewes. A son, AF7176 has been retained & used

extensively with very pleasing results.

Aylesbury Farms focus is to produce leading commercial rams for our flock ram clients. We use lambplan as a selection

tool whilst still retaining that excellent type that we are well known for.

Further information can be found on www.aylesburyfarm.com

Sires represented:

AF070176 Terrific type, length with hindquarter. Consistent breeder.

AV070247 Great type, excellent loin length. Performing well with PWWT.

DG070027 Outcross purchased for positive eye muscle. Proving to be a good breeding combination with Aylesbury Farm ewes.

DG 050328 Extreme hind quarter & is giving more muscle depth to our flock.
